

## REMARKS

### Status of claims

- Prior to the present amendments claims 29, 31, 38 – 40, 42 – 47, 49, 50 and 57 – 67 are pending of which 29 and 57 – 59 are independent.
- Now claim 38 is canceled.
- Claims 29, 31, 39, 40, 42 – 47, 49, 50 and 57 – 67 are amended.

### Amendments

All remaining claims are amended in order to answer to all Rejections 35 order 112 and to all Objections.

No new matter has been added. In claims 57 and 58 apparatus features have been added: "said mobile data carrier / said read and write station being affiliated to said authorization system (A) by a basic system preparation and comprising a memory with initialization data (DI)."

This is described in original publication US 2003/0033527 A1 in paragraph [0035] last lines: "The affiliation to the system A for all read and write stations and all identification media is assured by a basic system preparation or basic initialisation."

The Office Action objected to the use of periods in lines 7 and 10 of claims 29 and 57-59. The cited punctuation marks are commas marred by a poor scan. The current amendment clarifies those punctuation marks.

Applicant respectfully requests the Examiner to pass this application to allowance.

Respectfully submitted,

/s/
